PROFESSIONAL EXPERIENCE (5 YEARS+)

Software Engineer II

May-2025 – Present

Foodi

Ridesharing part

- Designed and built **trip orchestration** and tracking flows, managing full ride lifecycle events (matching, pickup, trip progress, stoppages, completion, cash collection) with **WebSocket**-based real-time updates.
- Implemented the Trip Request flow using the **Strategy Pattern** and an **Event-Driven Architecture**, enabling scalable, extensible dispatch logic and decoupled inter-service communication.
- Designed and implemented a **Trip Search module** based on location, availability, and business filtering rules to ensure fast and accurate matching.
- Developed and optimized the **Driver Scoring (Ranking)** System, incorporating factors like ratings, completion rates, and proximity.
- Designed cancellation handling, **ETA/route updates**, and integrated scheduled trip functionality for enhanced trip flexibility.
- Collaborated closely with mobile and backend teams, ensuring smooth API integration and deployment support across platforms.
- Integrated and enhanced real-time communication framework using WebSocket Gateway to support multi-dispatch (bidding), **trip tracking**.
- Implemented database-backend metadata tracking and integrated **RabbitMQ** as an external **relay broker** for reliable message persistence, durability, and scalability.
- **Optimized performance** and usability by integrating **Redis caching**, and improving database interactions.

Tech Stack: Java, Spring Boot, PostgreSQL, ScyllaDB, Kafka, RabbitMQ, Websocket, Gradle, Docker, Kubernetes (k8s)

Software Engineer

Feb-2023 – Apr-2025

ADN diginet Ltd

My Life - (Metlife APP)

- Improved Kafka idempotency for core services, ensuring consistent and reliable transaction processing across systems.
- Led Data Migration activities, ensuring seamless transfer of data from legacy systems to updated.
- Participate & contribute to system architecture & documentation.
- Research, Design, and Implement scalable API's

Tech Stack: Java, Spring Boot, PostgreSQL, MSSQL, Maven, Kafka, Git, JavaScript, K6, Docker, Kubernetes (k8s)

Software Engineer

Aug-2022 – Feb-2023

Ctrends software & services Ltd

- Design and build web and enterprise application using Java SpringBoot.
- Collaborate with cross-functional teams to analyze, design, and implement new features.

Tech Stack: Java, Spring Boot, PostgreSQL, Maven, Kafka, Git, JavaScript, K6, Docker, Kubernetes (k8s).

Programmer

Feb-2021 – Jul-2022

Asian Technology Limited

- Design and build web and enterprise application using Java SpringBoot.
- Collaborate with cross-functional teams to analyze, design, and implement new features.

Tech Stack: Java, Spring Boot, MSSQL, Maven, Kafka, Git.

EDUCATION

B.Sc. in Computer Science and Engineering, CGPA: 3.02

2019

Premier University Chittagong

SKILLS

Programming Languages

- Java, Spring Boot
- Microservices Architecture, SOLID Principles, Design Pattern
- Redis, Kafka

Database

PostgreSQL, MySQL, MSSQL, ScyllaDB
